From: Director, Office of Fire and Aviation

Subject: Standards for Identifying Fire Planning Units

DD: 05/14/04

The Fire Program Analysis (FPA) Implementation Coordination Group (ICG) has developed a set of preferred standards for responding to Information Bulletin No. 2004-086, signed by the Bureau of Land Management Director on April 5, 2004. Information Bulletin No. 2004-086 requires the identification of Fire Planning Units and related information by May 14, 2004. It also provides information for identifying Fire Planning Units. The attached submission standards are being distributed through the five federal fire management agencies at the state/regional levels and to the Geographical Area Chairpersons.

Our preferred method of submission for the data is a coordinated response by Geographical Area. This will allow us to more efficiently assemble and analyze the data. Specific submission requirements are identified in Attachments 1 and 2.

Please contact Jim Rosetti, Office of Fire and Aviation, at (208) 387-5197 (office), or (208) 863-8953 (cell) if you have any questions.

Signed by:
Timothy M. Murphy
Acting Director
Office of Fire and Aviation
